Jira, Figma, Advanced Excel (Data Visualization, Pivot Table, VBA), HubSpot, Airtable, Asana, Microsoft Office, Tableau, Power BI (developing), Placer.ai, Python, R Studio, SQL, HTML/CSS

WORK EXPERIENCE

JPMorgan Chase & Co.

Jun 2026 - Present

Risk Management & Compliance, Product Strategy Intern, Data & Analytics Products

- Own product enablement and go-to-market execution for compliance product launches, developing training materials and governance-forum communications that drive adoption across firmwide users
- Coordinate 30+ product, engineering, and business partners across 5 global offices using Jira as the single source of truth for 3 epics and 50+ user stories, streamlining cross-functional communication and reducing clarification time
- Serve as the first point of contact for post-launch product support on a firmwide tool, triaging user-reported defects and documenting reproduction steps and expected behavior for engineering to drive resolution within a 2-3 business-day turnaround
- Lead product discovery for a workflow-enhancement initiative by mapping the current-state process end to end, investigating use cases through user research, and authoring a structured PRD with testable hypotheses validated directly with users
- Build multiple self-contained interactive HTML prototypes, including an analytics dashboard and collaborative-drafting workflow, using LLM-assisted tools to cut design-mockup turnaround from 3–4 weeks to under 1 hour

Denison Consulting

Jan 2024 - Present

Manager of Strategy & Analytics

- Applied data-driven decision-making to business analysis of 20+ industry reports using Excel pivot tables and Tableau, implementing system-based automation through HubSpot CRM to improve reporting accuracy and operational compliance
- Supervised development of a Python-based email automation tool tailored to client outreach needs, and directed client outreach campaigns including cold calling, securing 8 qualified partnership meetings
- Managed and coached a team of 5 analysts through structured 1:1s, improving delivery efficiency by 20% through project workflow management using Asana

Cleveland Neighborhood Progress

May 2025 - Jul 2025

Economic Development Intern

- Analyzed economic and demographic data for 10+ neighborhoods using Placer.ai, identifying 50+ commercial assets and market opportunities to inform strategic planning for \$2M+ corridor revitalization initiative
- Conducted market research for 100+ local stakeholders, producing 4 marketing templates and asset guides to increase visibility for community programs

Whandle Candle Store

Apr 2022 - Dec 2022

Founder

- Developed merchandise financial plan and inventory forecasting model, balancing sales projections with production capacity to generate \$500+ in revenue while reducing cost of sales by 15%

COMPETITIONS & PROJECTS

Recipe Cost & Margin Risk Dashboard

2026

- Built an end-to-end analytics pipeline using Excel, SQLite, Tableau, React, and Python to monitor recipe margins and flag breaches of persona-specific thresholds, translating product KPIs into actionable alerts
- Identified a data-integrity issue where reporting had silently drifted from source data; rebuilt a one-command Python refresh script to ensure dashboard-database consistency through data lineage and product judgment

Options Strategy & Risk Analysis

2026

- Conducted quantitative analysis of a long straddle options position, evaluating payoff structure, break-even thresholds, and profit/loss scenarios under varying market conditions; identified and documented a discrepancy
